**RE: CROSS CONNECTION CONTROL SURVEY ADDRESS: XXX MAIN ST  
ROGERS CITY, MI 49779**

Dear Rogers City Water Customer:

You are receiving this letter because your participation is required in meeting our Cross Connection Control program, as required of all water systems under Michigan Public Act 399, 1976. The purpose of this program is to identify and eliminate cross connections to the potable water system, preventing contaminants and ensuring that all water customers have safe drinking water.

The City of Rogers City has retained CCRA Professional Services conduct a survey on potable piping systems within the residential properties within the city's water distribution system. The survey is necessary to identify those potable water systems that require installation of a backflow prevention device. **Accordingly, please complete the included paper survey to the best of your ability and mail or email it back to CCRA. Instructions on how to return the survey are on the survey.** Your cooperation in meeting this state mandate is appreciated. To see a copy of this letter please visit the city's website to corroborate this letter.

**Should you require further information on the Cross-Connection Control Program, please contact us at (630) 450-7781.**
